Offecct Edition

Soundwave Ennis is a part of Offecct's collection Edition. Under the name Edition, we intend to regularly bring you last century news in a limited, new edition. The collection is not created by us, but it is selected by us. With Edition we would like to bring you last century news. Once upon a time, it was launched by legends in architecture and design. Now, it is selected by us, because we think it should be paid more attention.

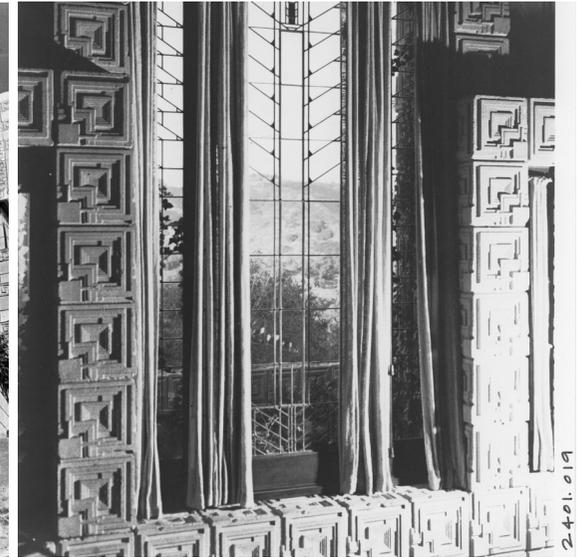

Biography Frank Lloyd Wright

Frank Lloyd Wright (1867-1959) was an American architect widely recognized for creating the first domestic American architectural style, referred to as the Prairie Style. Wright believed we all have the right to live a beautiful life regardless of economic or social status and in his work, he pioneered the open floor plan, championed new building techniques and cultivated a tradition for the use of natural and local materials.

Landmark buildings that have become subject to worldwide pilgrimage for generations of architects, such as Falling Water (1935) and the Solomon R. Guggenheim Museum (1956), further establishes Wright as one of the greatest architects of the twentieth century.
